SKILLS

Vue.js (Vue 2 & 3)

Nuxt

React / React Native

TypeScript

JavaScript

HTML / CSS / SCSS

Tailwind CSS

Vuex / Pinia / Redux

Arabic & RTL interfaces

Angular

Git

LANGUAGES

Arabic	Native
English	Fluent

EDUCATION

Bachelor of Engineering (BEng)
Computer Engineering

An-Najah National University,
Nablus
2010 – 2014
Top 10% of class · 3.35 GPA

SUMMARY

Senior frontend engineer, **building production web and mobile applications since January 2015** with Vue.js (Vue 2 & 3), Nuxt, React, React Native and TypeScript. Currently an independent contractor providing frontend engineering services directly to **Upwork's own engineering organization**, working within a live, high-traffic production environment — **nine consecutive contracts since 2022, each rated 5.0 out of 5**. Also frontend and mobile team lead on two established products — a school platform and a football app — with **150,000+ combined installs** on Google Play. Experienced with bidirectional Arabic/English interfaces, and comfortable working across an existing frontend codebase: component libraries, state management and performance.

SELECTED PROJECTS

Edubook — Web & Mobile School Platform

App: 50,000+ installs

Frontend & Mobile Team Lead · 2018 – 2022 · [edubook.me](#)

Frontend and mobile team lead on an all-in-one school management platform connecting administrators, teachers, students and parents. Worked across both the web platform and the companion mobile app — dashboards, messaging, class scheduling, notifications and academic performance tracking — including the bidirectional layout that keeps Arabic and English equal in quality.

React · AngularJS / Angular · React Native · TypeScript · RTL / LTR

OnFire (Walla3t) — Football Companion App

App: 100,000+ installs

Mobile Team Lead · 2023 – 2024 · [React Native](#)

Mobile team lead on an interactive football app with live match scores, player stats and prediction-based challenge games with real prizes. Worked on the React Native codebase shared across iOS and Android, including full right-to-left support.

React Native · TypeScript · Redux · RTL / LTR

WORK HISTORY

Senior Frontend Engineer — Independent Contractor

Jun 2022 – Present

[Upwork](#) · [Remote](#)

- Providing frontend engineering services (Vue.js, Nuxt, Vuex, Pinia, TypeScript) directly to Upwork's own engineering organization, within a live, high-traffic production environment, held to their internal engineering standards and delivery workflows.
- Nine consecutive contracts since 2022, each rated 5.0 out of 5.

Senior Front End Developer

Jan 2021 – Jun 2022

[Bloovo](#) · [Dubai, UAE](#) · [Remote](#)

- Managed a team of 8 developers, providing estimations, sprint planning and daily code review.
- Set project structure, standards and team practices; prepared and reviewed releases before deployment in an Agile-driven environment.

Senior Front-end Developer

Dec 2018 – Dec 2020

[Xngage](#) · [Ohio, US](#) · [Remote](#)

Built application UIs in AngularJS, React, Redux, Kendo UI and TypeScript for an e-commerce platform serving millions of users; trained and supervised 3 team members.

Front-end Developer

Dec 2014 – Nov 2018

[Foothill Solutions](#) · [US](#) · [Remote](#)

Built application UIs in AngularJS, Angular, React, Redux and TypeScript; worked alongside AWS and .NET services.
